DXpedition News

Lord Howe Island - VK9L Miné Sugiyama JA2NQG and JAØGZ will operate as **VK9LS** and **VK9LT** from Lord Howe (OC-004) around Sept. 17-22 (the exact dates will be announced mid-Sept.) They will operate on 80-10 meters, including the new bands, on CW and SSB. If the K index is especially low, they'll try 160 meters on 1833 kHz. QSL home call: P. O. Box 5, Nimomiya 259-01, Japan. Sunrise 1930Z; sunset 0715Z.

Glorioso - FR/G Jack Quelli FR5ZU says he'll be on as **FR5ZU/G** (AF-011) Sept. 5-20, especially 11-1500Z. Try the DX nets and 14082 or 21081 khz on RTTY, listening up 5-15 kHz. QSL home call: 1 Cite Meteorogigue, F-97449 Le Chaudron, Reunion Island, via France. Sunrise 0300Z; sunset 1450Z. Next stop:

Juan de Nova - FR/J Jack will be **FR5ZU/J** (AF-012) Sept. 21-Oct. 4; same info as above. Then on to:

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Europa - FR/E as **FR5ZU/E** (AF-009) Oct. 5-16. [This is the same DXCC country as Juan de Nova.]

Antigua - V2 Jerry Jendraszkiewicz KE9I will operate CW and SSB on all bands, including the new bands, Aug. 31-Sept. 5, on his honeymoon. He'll be most active in the mornings and evenings, local time. Sunrise 1000Z; sunset 2215Z. QSL home address: 5459 W. 83rd Pl., Crown Point IN 46307-1408, or via the **USA** bureau (**not** via island bureaus.) Next stop is:

British Virgin Islands - VP2V Jerry will be active as **VP2V/KE9I** Sept. 5-10; same info. Sunrise 1000Z; sunset 2215Z. He'll make a special effort in the CW Sprint 00-0400Z Sept. 6 Then on to:

Anguilla - VP2E where he'll be on as **VP2E/KE9I** Sept. 10-17. Same info as above, plus an entry in the SSB Sprint 00-0400Z Sept. 13.

Shortly Noted

- **V5/DJ6SI:** Baldur is on the road again, this time in southern Africa. Try 25 khz up on CW. QSL home call with $2, within six months of the operation.
- **R3A** and a host of special callsigns will commemorate Russia independence Aug. 19-23. Watch for RXXA, UXXA, and 4LXXA, where XX is the date: 19, 20, etc. An award will be available for working these stations.
- **C9RJJ** is John Janssen WA4WKY (ex-KZ5RQ), at the US Embassy in Maputo. Try 15-meter CW and SSB around 1600Z, QSL W8GIO. (DXNS.)
- **ET3JR** is Jacques FD1PJQ, who will be in Addis Ababa for three years. He'll be active on 20, 15, and 10 meters only. He reports verbal permission only at this time, but has received assurances of written permission. QSL via FD1OYK. (DXPress.)
- **P4ØP** is Naoki Akiyama NX1L, Sept. 7-9, on all bands and modes. QSL home call. (DXNS.)
- **ZS3** callsigns are **not** Namibia. They are from a new call area consisting of the portion of the Cape of Good Hope Province (ZS1) that is north of the Orange River. The remainder of Cape of Good Hope Province remains ZS1.
- QSL Romeo's **9DØRR** operation from Iran via Box 766, Brooklyn NY 11230-0766, and **not** via NT2X's *Callbook* address.
- The **DXCC backlog** remains at several months: readers report recently receiving their cards back, with computer printout of their DXCC record, from endorsement applications mailed in January and February.
- The **DXCC Annual Listing** deadline is Sept. 30. To be included in the list in QST next Spring, you must send in your cards by Sept. 30.
- **SSB Nets:** check-ins: **14222**: (0030Z) SU1AY OD5RN; **14227**: (11,22Z) EL2PP T3ØJH D2/F6BLQ; **14236**: (02Z) ZK1XR FR5ZQ/G KH3AF; **14256:** (2330Z) D2FGC 3XØHNU TU2JL OD5RH FR5ZQ/G; **21335**: (14Z) S79KMB S21A J28YC VU2NTA ZC4ST 9A2PM.
- **RTTY**: Regulars: **4U1UN** 14085± 0000Z Wed.; **ES7FQ** 14090 0400Z; **VR6BX** 14090 0145Z. Spots: **AP/WA2WYR** 14085 1700Z; **VQ9IL** 14085 2015Z; **A92FG** 14073 ARQ 2315Z; **Z24JC** 14089 1650Z; **C9RJJ** 14090 1710Z; **5V7DP** 21085 1805Z; **9Q5NW** 14090 0140Z; **P29BT** 21085 1130Z; **H44JS** 14090 0450Z.

Islands On The Air

- **OH3MIG/TA** will be active until the end of the month. He'll try to active a New One for IOTA, perhaps the Anatolia Region South West.
- **GØKTD** will be active from the Isles of Scilly (EU-011) Aug. 27-30. Try the IOTA frequencies: 14260, 21260 and 28460 kHz.
- **JF4FUF/JA6** will operate from the Tokara Archipelago (AS-049) Aug. 28-31, on 160-6 meters. QSL via JO3LDN.

Propagation Watch

The bands should improve over the next week, thanks to the quieter side of the sun rotating in our direction, plus seasonal improvements. The sun is gradually regaining its 27.5-day pattern of activity, which suggests that solar flux will bottom out (probably below 100) this weekend (Aug. 24-25), and then increase to the 150 range the first week in September.

The Sunspot Regions and coronal holes that disrupted band conditions in the past two weeks have rotated to the back side of the sun, and shouldn't bother us again until early September. In particular, Region 7248 should have lost most of its punch by the time it returns at the end of this month. (Region 7248 was responsible for much of the geomagnetic activity and poor band conditions the past two weeks.) Region 7260 is very large and magnetically complex, but so far it has produced only small flares, with little disruption to the bands.

The combination of more stable geomagnetic conditions, increasing solar flux, and the approach of the equinox in late September spell improved conditions on the higher bands. 15 meters has already recovered from its summer doldrums, and 12 and 10 meters have shown some minor openings. Most openings on the higher bands have been north-south, but these should spread more east and west over the next two months.

A good sign of the maximum useable frequency (MUF) increasing is shortened skip on a lower band. If relatively nearby stations are increasing in signal strength on one band, check the next higher band for an opening in the same direction. And remember to call some CQs; if everyone simply listens, and nobody transmits, the band will appear 'closed' when it is really open.

The next two months will probably be the last gasp for wide-spread, long-haul openings on 10 and 12 meters for Sunspot Cycle 22. Pay particular attention to these bands to make the most of this opportunity. The smoothed sunspot number won't exceed 100 again until the year 2000!

QSLing Abuses

The ARRL Awards Committee has asked the DX Advisory Committee (DXAC) to study possible new DXCC rules concerning QSLing abuses by DXpeditions and managers. The DXAC seeks input from the DX community on this subject. Among the QSL practices that have concerned DXers are: requiring payment in excess of return postage costs, refusal to respond to QSL requests via the bureau, unannounced policies of 'blacklisting' DXers for alleged duplicate contacts, 'bribing' QSL managers with offers of blank QSLs from rare countries, and delays of many months in QSLing. Should the DXCC rules include specifics as to right and wrong ways to QSL? Send your comments to the DXAC, c/o ARRL Hq., 225 Main St., Newington CT 06111. [Send a copy to The DX Bulletin; we'll share your suggestions with our readers. -ed.]

Mount Athos Remains Open

The monks of Mount Athos have decided not to close their community off from the rest of Greece. The monks threatened to close the community when a one-time property tax included the monks' extensive property throughout Greece. The Greek government relented, and will continue to exclude all monastery-owned property from the tax. [Getting radio permission is another matter.]

ON4USA/p Special-Event Operation

The GDV Group will operate **ON4USA/p** from the WWII American Military Cemetery in Henri-Chapelle, in eastern Belgium 0800Z Sept. 12 to 1600Z Sept. 13, to commemorate the 48th anniversary of the liberation of that part of Belgium by US troops. Try 3540, 7040, 14040, 21040, and 28040 kHz on CW, and 3670, 7070, 14310, 21380, and 28480 kHz on SSB. QSL to ON5PL, via the ON bureau, or direct to Box 11, B-4800 Verviers 1, Belgium.
